

BREWATHON

Crafting the Future One Block at a Time

MISSION OBJECTIVE: CHAOTIC CREATIVITY

Forget standard hackathon formulas. No generic weather apps. No to-do lists. **BREWATHON** is about **CHAOTIC CREATIVITY**. We want web experiences that are weird, wonderful, and technically impressive. The goal is to build something functional & fun and then show off to the server during the Demo.

EVENT SCHEDULE

Date: 12th December, 2025

HACKATHON

- **Duration:** 8:00 AM to 7:00 PM
- **Venue:** Birla Auditorium, SIT, Tumkur

WORKSHOP: CRASH COURSE

- **Duration:** 8:00 AM to 10:30 AM
- **Venue:** Media Center, SIT, Tumkur

Note:

- The Hackathon and Workshop will run in tandem, allowing participants to learn and build concurrently.
- The Workshop is not compulsory for all and any one can attend it.

THE WORKSHOP: CRASH COURSE

No Experience Needed! If you don't know anything, no problem we will teach you the necessary stuff.

Workshop Topics Covered:

HTML, CSS, and JavaScript

- Building blocks of web development
- Creating interactive web pages

API Integrations

- Connecting to external services
- Fetching and displaying dynamic data

Package Management

- Using npm and modern development tools
- Managing project dependencies

Introduction to Generative AI (Gen AI) Concepts

- Understanding AI-powered applications
- Integrating AI into your projects

THE HACKATHON

7:30 AM - 8:00 AM	Registration & Welcome
8:00 AM - 12:30 PM	Hackathon Building Session (Part 1)
12:30 PM - 1:00 PM	Lunch Break
1:00 PM - 3:00 PM	Hackathon Building Session (Part 2)
3:00 PM - 4:15 PM	Project Submission & Evaluation Round
4:30 PM - 4:45 PM	Top 10 Teams Announcement
4:45 PM - 6:00 PM	Top 10 Teams - Project Demos & Presentations
6:30 PM - 7:00 PM	Winner Announcement & Awards Ceremony

IDEA INSPIRATION

This is what gets us excited—but feel free to surprise us!

1. AI-NATIVE GAMES

Don't just make a game; make a game that thinks.

Examples:

- Dungeon crawler with GenAI-generated maps
- Murder mystery with AI-changing motives
- Strategy game where the AI adapts to your playstyle

2. GENERATIVE UI & ART

Code as art. Interfaces that feel alive.

Examples:

- Website that ages and decays over time
- Webcam to ASCII art mirror
- Generative background patterns that respond to music
- Interactive particle systems

3. INTERACTIVE FICTION

Narratives where the reader holds the pen.

Examples:

- Visual novel vs AI protagonist
- History simulator (Butterfly Effect scenarios)
- Choose-your-own-adventure with AI-generated storylines
- Collaborative storytelling platform

4. INTELLIGENT MICRO-TOOLS

Tiny apps, massive utility (or hilarity).

Examples:

- Corporate slang translator
- Code comments to Haiku converter
- Meeting notes summarizer with personality
- AI-powered excuse generator

5. SOCIAL SIMULATION

Parodying the human experience.

Examples:

- Dating app for ghosts
- Hype-bot that agrees with everything
- Social media for fictional characters
- Virtual pet with existential crisis

BREWATHON JUDGING CRITERIA

Judges will score projects based on their adherence to the core mission, technical ambition, and final execution of the project.

1. CHAOTIC CREATIVITY & NOVELTY

The "**Weird & Wonderful**" Factor

Focus: How well the project delivers on the "**weird, wonderful, and technically impressive**" mandate.

Evaluation:

- **Originality of Idea:** The project's uniqueness and divergence from standard, safe hackathon concepts (e.g., weather apps, to-do lists).
- **Thematic Alignment:** How effectively the project translates its concept into a functional web experience that embodies **CHAOTIC CREATIVITY**.

2. TECHNICAL EXECUTION & DYNAMIC CONTENT

The **"Technically Impressive"** Build

Focus: The quality of the code and implementation, leveraging the workshop content.

Evaluation:

- **Functional & Fun:** The application works reliably and the core features are complete and enjoyable to use.
- **Dynamic Generation:** Successful implementation of logic that generates, changes, or responds with content dynamically. (This directly addresses the Gold Standard: Dynamic content generation and avoids the Anti-Pattern: Static pages with no logic.)
- **Integration:** Effective use of APIs, package management, or Gen AI concepts taught in the workshop.

3. POLISH AND PERSONALITY

The **"Gold Standard"** Finish

Focus: The overall user experience and the project's unique character.

Evaluation:

- **Interactive UI & Animations:** The interface is responsive, engaging, and uses effective visual elements.
- **Final Polish:** Attention to detail, including design, error handling, and a distinctive Personality that makes the app memorable.

4. SPIRIT OF ENGAGEMENT

The **"Rules of Engagement"** Adherence

Focus: Following the guidelines for participation and effort.

Evaluation:

- **Code Presence:** The project is a functional prototype with demonstrated code, not merely a "Concept" deck.
- **Independence:** Evidence that the work was created during the hackathon and not copied line-by-line from an existing tutorial.

5. THE DEMO EFFECTIVENESS

Show Off to the Server

Focus: The team's ability to present their creation and generate excitement.

Evaluation:

- **Clarity:** The team concisely explains the project's features, challenges, and overall mission.
- **Enthusiasm:** The presentation is engaging, highlighting the most "fun" and impressive aspects of their application.

PRIZES & RECOGNITION

Total Prize Pool: Rs. 12000/-

1st Place: Rs. 6000/-

2nd Place: Rs. 4000/-

3rd Place: Rs. 2000/-

All winners will receive:

- Certificates of Achievement
- Recognition on event platforms
- Eternal glory in the **Brewathon Hall of Fame**

All Participants will receive a Certificate of Participation

RULES OF ENGAGEMENT

Come with Code, Not Just Concepts

- We want working prototypes, not PowerPoint presentations
- Show us something we can click, play with, or break

Embrace the Chaos

- Safe ideas are boring ideas
- Take risks, experiment, and have fun

Build During the Event

- Some pre-cook code is allowed but the actual project should be built during the hackathon.
- You can use frameworks and libraries, but the core logic must be fresh

Team Size

- Solo or teams of 2-4 people
- Collaboration is encouraged!

Open Source & Learning

- You can reference documentation and tutorials
- But don't copy-paste entire projects

WHAT TO BRING

- Your laptop (fully charged!)
- An open mind with enthusiasm and creativity
- Any USB cables or peripherals you need

WHAT WE PROVIDE

- WiFi and workspace
- Power outlets for charging
- Pizza and refreshments
- Mentorship and technical support
- Workshop materials and resources

FREQUENTLY ASKED QUESTIONS

Q: Do I need to know how to code?

A: No! The workshop will teach you everything you need to get started.

Q: Can I participate alone?

A: Absolutely! Solo participants are welcome, or you can form teams at the event.

Q: What if I don't have a project idea?

A: We provide idea inspiration, and mentors will be available to help you brainstorm.

Q: Will food be provided?

A: Yes! Meals and refreshments will be provided throughout the day.

Q: What should I build on?

A: Web-based projects using HTML, CSS, JavaScript, and any APIs or frameworks you choose.

JOIN US FOR BREWATHON!

Build. Break. Brew. Repeat.

Where chaos meets code, and creativity knows no bounds. Be part of something weird, wonderful, and technically impressive.

See you at **Brewathon!**
